Qualifications of the Nuclear Medicine Technologist

Medical Staff Policies & Procedures	
Document Owner: Michael Messina	Date Approved by MEC: 08/12/2012
Author: Linda Liana	Date Last Updated: 08/12/2015

PURPOSE: To delineate who determines the qualifications of the Nuclear Medicine Technologists who use equipment and administer procedures (TJC regulation MS.03.03.01 EP 16)

SCOPE: The Department Manager, the Radiology Department Chairman, and the Nuclear Medicine Supervisor have jurisdiction on the qualifications of the Nuclear Medicine Technologists.

POLICY:

1. The qualifications and responsibilities of the Nuclear Medicine Technologists are listed in their position-specific competencies which are developed by the Radiology Manager.
2. The Radiology Manager and the Nuclear Medicine Department Supervisor review and approve the position descriptions to insure that the Nuclear Medicine Department technologists meet the qualifications necessary to use the equipment, administer radionuclides and administer procedures.
3. Licensure is maintained under NJ DEP guidelines and is verified through primary source verification by the Imaging Department.
4. Registration is maintained and verified by the Radiology Manager through primary source verification by the Imaging Department.
