Qualifications of the Radiologic Technologist

Medical Staff Policies & Procedures	
Document Owner: Michael Messina	Date Approved by MEC: 08/12/2012
Author: Linda Liana	Date Last Updated: 09/11/2018

PURPOSE: To delineate who determines the qualifications of the Radiologic Technologists who use equipment and administer procedures (TJC regulation MS.03.03.01 EP 17)

SCOPE: The Department Manager, the Radiology Department Chairman, have jurisdiction on the qualifications of the Radiologic Technologists working in the Diagnostic Imaging Department.

POLICY:

1. The qualifications and responsibilities of the Radiologic Technologists are listed in their position-specific competencies which are developed by the Radiology Manager.
2. The Radiology Manager reviews and approves the position descriptions to insure that the Radiologic technologist meet the qualifications necessary to use the equipment, administer procedures.
3. Licensure is maintained under NJ DEP guidelines and is verified through primary source verification by the Imaging Department.
4. Registration is maintained and verified by the Radiology Manager through primary source verification by the Imaging Department.
