DESCRIPTION
This interactive endocrine cancer conference will provide an opportunity for Endocrinologists, Radiologists, Pathologists and Primary Care Physicians to delve into the treatment of patients with complicated thyroid cancers. The program will allow for sharing of knowledge and opinions that will enhance outcomes for patients.

OBJECTIVES
1. Determine appropriate treatment for small papillary thyroid cancer;
2. Discuss pathology reclassification of PTC with the new diagnostic entity of NIFT-P;
3. Describe the effect of radioactive iodine therapy on salivary glands related to thyroid cancer;
4. Review the minimally-invasive approach for parathyroid surgery.
